

## Objective 7 Remediation

Express a pattern as an equation given a table.

### Writing an equation from a table:

- Use  $y = mx + b$  (Slope-Intercept Form)
- Determine  $m$  (Slope) by finding the change in  $y$  divided by the change in  $x$ 
  - Determine  $b$  (Y-intercept) by finding the  $y$  value when  $x = 0$
  - Substitute  $m$  and  $b$  into  $y = mx + b$

Ex. A

x	0	1	2	3	4	5
y	12	15	18	21	24	27

$$m = \frac{\Delta y}{\Delta x} = \frac{15 - 12}{1 - 0} = \frac{3}{1} = 3$$

$$b = 12$$

$$y = mx + b$$

$$y = 3x + 12$$

Ex. B

x	2	4	6	8	10	12
y	3	-2	-7	-12	-17	-22

$$m = \frac{\Delta y}{\Delta x} = \frac{-2 - 3}{4 - 2} = \frac{-5}{2}$$

$$b = 8$$

$$y = mx + b$$

$$y = -\frac{5}{2}x + 8$$

**Write the equation for the given table.**
