High School Mathematics Department

Dear Parents and Guardians,

As your child's Algebra I Part A teacher, I would like to inform you of the upcoming unit of study and the objectives we will be covering. For, approximately, the next 2 weeks, we will be studying Solving Linear Equations. The following objectives will need to be met with 80% proficiency in order for your child to advance to the enrichment activities within this unit:

- Objective 1 - Define subtraction property of equality, addition property of equality, solution, division property of equality, multiplication property of equality, reciprocals (covered throughout the objectives below)
- Objective 2 - Solve equations by using addition (3.1)
- Objective 3 - Solve equations by using subtraction (3.1)
- Objective 4 - Solve equations by using multiplication (3.2)
- Objective 5 - Solve equations by using division (3.2)
- Objective 6 - Determine if the solution is correct (3.1 & 3.2)

Knowing and understanding the objectives at the beginning of a unit will be an asset to your child's mathematical growth and achievement. Please discuss with your child the importance of mastering these objectives in order to be successful both now and in the future. Thank you for working with me and your child to make this a successful unit.

Sincerely,

Mrs. Joy Reustle

Mathematics Teacher
