

Review for Lessons 3-1 through 3-3

Complete each statement with the word *always*, *sometimes*, or *never*.

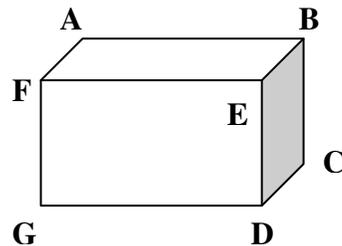

- 1) Two lines in the same plane are _____ parallel.
- 2) Two lines in the same plane are _____ skew.
- 3) Two noncoplanar lines _____ intersect.
- 4) Two planes _____ intersect.
- 5) A line and a plane _____ have exactly one point of intersection.
- 6) If two planes do not intersect, then they are _____ parallel.

Use the information given to name the segments that must be parallel. If there are no such segments, write *none*.

Given that the hidden point is H answer the following.

- 16) Name two skew lines
- 17) Name two parallel lines
- 18) Name two parallel planes

Classify each pair of angles as *alternate interior angles*, *same-side interior angles*, or *corresponding angles*.

19) $\angle STU$ and $\angle SZX$

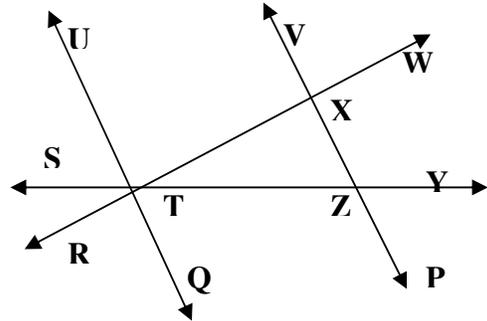

20) $\angle WXZ$ and $\angle YZX$

21) $\angle QTZ$ and $\angle VZT$

22) $\angle QTZ$ and $\angle PZT$

23) $\angle UTZ$ and $\angle VZY$

24) $\angle VXT$ and $\angle XTQ$

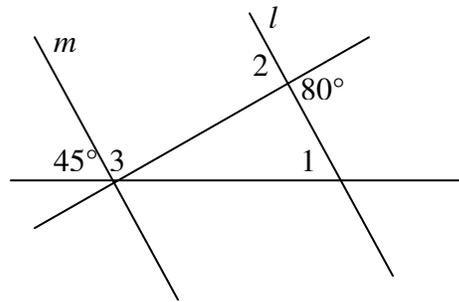

Given $l \parallel m$ find the measure of each angle.

25) $m\angle 1$

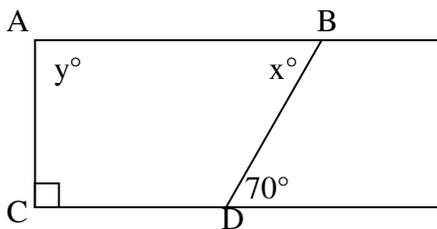

26) $m\angle 2$

27) $m\angle 3$

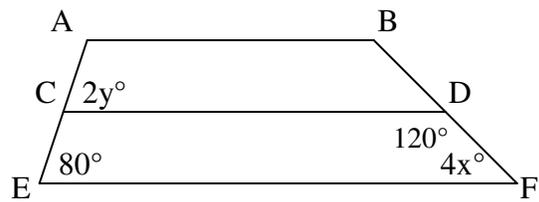

Solve for all unknown variables.

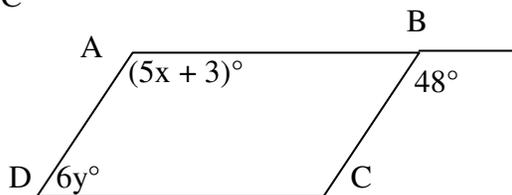

28) line $AB \parallel$ line CD

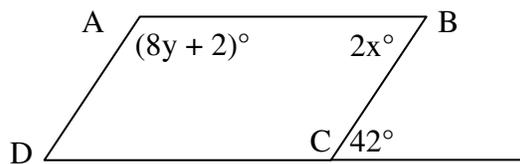

29) line $AB \parallel$ line $CD \parallel$ line EF

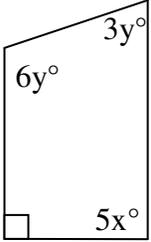

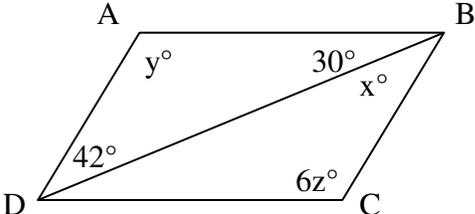

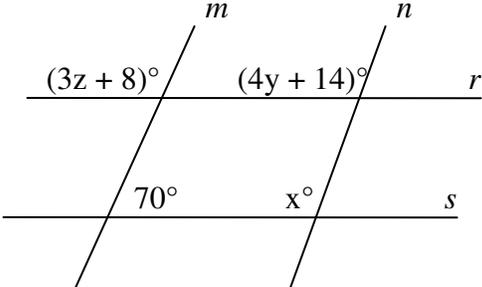

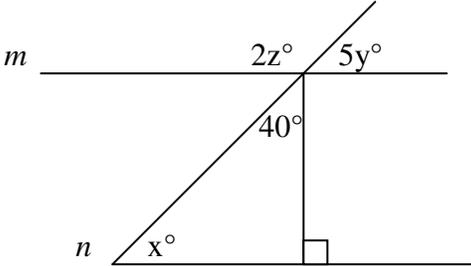

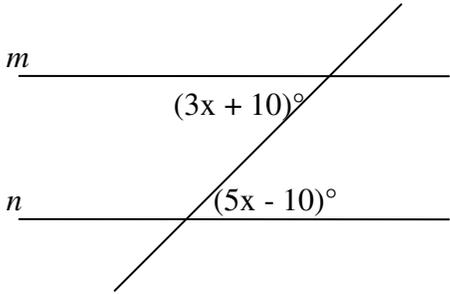

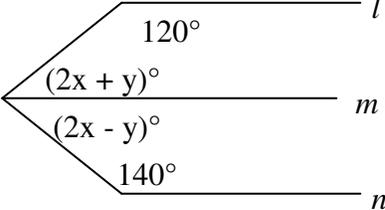

30) line $AB \parallel$ line CD and line $AD \parallel$ line BC

31) line $AB \parallel$ line CD and line $AD \parallel$ line BC

<p>32) both vertical lines are parallel</p> 	<p>33) line AB \parallel line CD and line AD \parallel line BC</p>
