# Chapter 16 Immigration and Urban Life Notes

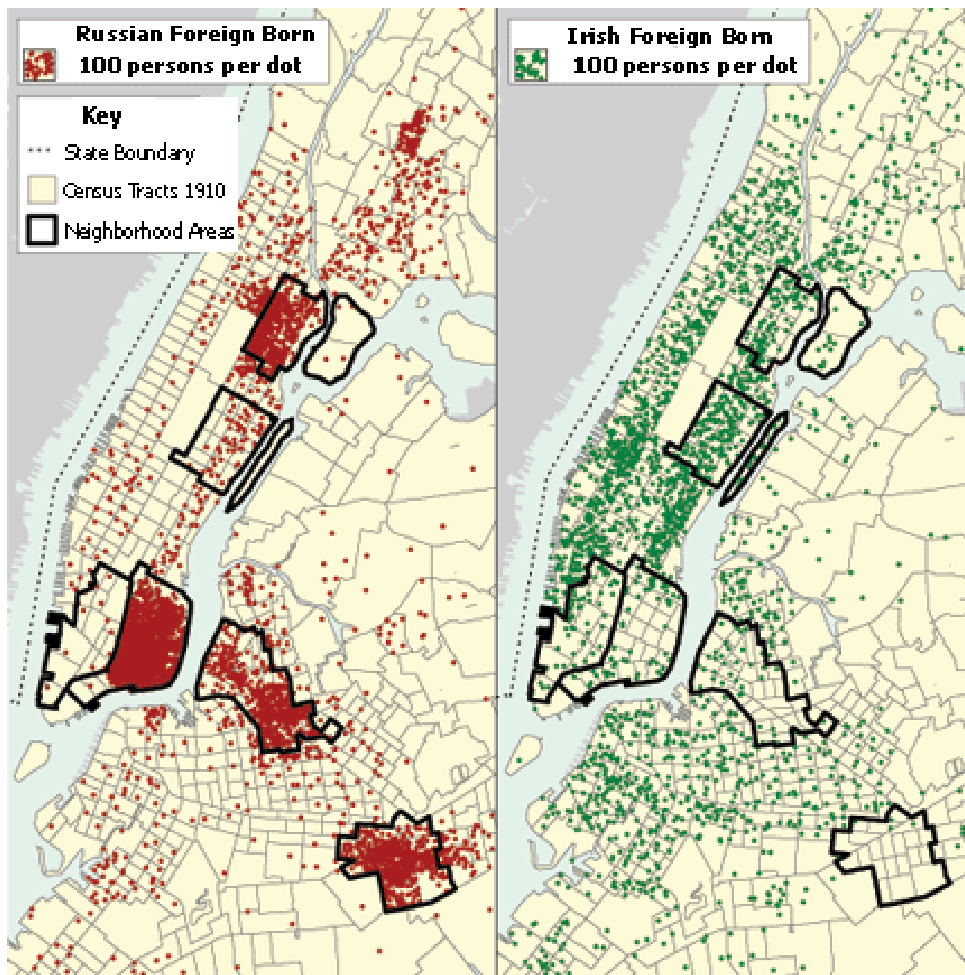

1. Straight from the last chapter, how many immigrants moved to the U.S. between 1860 and 1900?

2. Where did the average immigrant settle- on farms/rural land or in the cities?

3. 75 percent of New York City residents and 60 percent of Chicago residents were immigrants in 1890. How could this possibly create rivalry or problems within the two cities?

4. Based off of this diagram how do you perceive the settlement patterns of immigrants in Chicago?

6. This is a picture of the boroughs of area of New York City. How do you perceive the different settlement patterns of immigrants in NYC?

7. This is a picture of tenement living in NYC. How comfortable and clean was this life?
