Across Clues	Down Clues
5. Fungal infections of the skin are	1. An organism that decomposes dead
known as	organic matter is called a
3. When basidiomycetes germinate,	2. A small asexual reproductive cell is
they produce mycelium	called a
0. Yeast infections of the tongue in	3. Two different organisms living
humans is known as	together are said to be in
<ol><li>Bracket fungi, mushrooms, and</li></ol>	4. When 2 different strains of mycelium
puffballs belong to this phylum	join, their hyphae fuse and produce a
4. Saccharomycetes cerevisiae is	mycelium
better known as	5. Penicillin comes from this phylum
17. These anchor the fungus that	<ol><li>Upright stalks that produce spore</li></ol>
makes enzymes to digest food	cases at their tips are called
18. A fungus and an algae living	7. Common saprophytes in the soil are
together form a	found in this phylum
19. Spore cases where spores are	<ol><li>The part of the mushroom that grows</li></ol>
produced are called	above ground is also known as the
	body
	<ol><li>The habitat of most fungi is warm,</li></ol>
	dark and
	<ol><li>Yeast belong to this phylum</li></ol>
	15. An asexual spore produced by the
	Ascomycetes and most imperfect
	fungi are called
	16 A thread-like filament of fundi that

grow underground from the spore is

called \_\_\_\_
