

PHOTOSHOP PHOTOMORPH

Objective: The student will use a picture of themselves and one picture of an animal to seamlessly combine into a Photomorph that communicates a message about their inner self. The animal images may come from the internet as long as they are high quality. You don't want to combine a pixilated photograph with a high quality photograph or the resulting image will not give the seamless blend desired.

Homework: Bring in at least two animal pictures and one picture of yourself. Make sure that your face and the animal's face are facing the same way and have the same expression.

4- Exceeds expectations 3-Meets expectations 2- Needs Improvement 1- Does not meet expectations 0- Did not complete section

PHOTOMORPH:

1. Combine your name and the animal name. What name do you give your Photomorph?
-
2. List which mode was used to create the Photomorph
-
3. List the tool(s) used to clone one area to another.
-
4. List the animal used.
-

The animal's identity is evident when combined with the designer

4 3 2 1 0

The images are combined together seamlessly and the animals features align properly with yours

4 3 2 1 0

Images are of the same quality and adjusted with no pixilation

4 3 2 1 0

Image of animal is transparent enough and the mode was used effectively to still recognize the student
