## **Across Clues**

- 1. Adult frogs have a ____ chambered heart.
- 2. Male frogs clasp female frogs with their thumb pads called
- 4. Class for sharks and rays.
- 5. Class for jawless fish
- Process of male fish discharging his sperm onto eggs.
- 9. Frogs respire through their ____, especially in the winter.
- 13. Sense organ on fish containing sensory cells that can detect underwater vibrations.
- 14. Class for bony fish.
- 15. Openings on top of head of a ray where water enters.
- 17. Organs of respiration in fish.
- 19. Eardrum membrane of frogs.
- 21. Fin that grows from the posterior end and pushes the fish forward.

## **Down Clues**

- Fish have a ____ chambered heart.
- 3. The keenest sense in fish.
- 4. Type of camouflage in fish where ventral surface is lighter that dorsal surface.
- 6. Membrane (3rd eyelid) of frog that keeps the eyeball moist when on land.
- 8. Type of fertilization in sharks.
- Process of female fish laying her eggs.
- 10. Scale covering a shark.
- Thin, flat disks of bone that grow from pockets in the skin of bony fish.
- Hard plate that protects the gills.
- 16. Fins that correspond to the arms of higher vertebrates.
- 18. Major enemy of the frog.
- 20. Fins that correspond to the hind legs of higher vertebrates.
