

Art Major Sketchbook Assignment #8

Ripped Paper Collage – Create a ripped paper collage using any form of paper, newspaper, toilet paper, construction paper etc. I would suggest sticking to either a shiny or matt type of paper. Create a contour drawing of an object and environment showing the highlights and shadows on illustration board. You will rip small shapes of different values depending on your image and separate them into little

envelopes or baggies for storage. You will use a mixture of water and Elmers glue to adhere the ripped paper within the specific shapes to develop your image. Apply a small amount of the mixture to the surface and place the paper on top and reapply mixture. Continue until you have a completed work. Don't apply too much of a watery mixture or the work will start to buckle.
